Preparatory programs for admission

Applicants who want to enter a foreign university immediately after school, or after the end of another educational institution in Ukraine, we propose to undergo preparatory language courses abroad. Training programs exist both with educational institutions and regardless of them. Typically, training takes place in the city where the university is located.

Preparatory programs for admission will allow:

learn a foreign language or improve it;

improve the knowledge of profiling items to the level required by the university;

get acquainted with the culture of the country in which you are going to live at least 2-3 years;

explore the city and university before active study begins;

adapt to local conditions;

Get acquainted with future teachers and fellow students.

Such training programs last from one month to a year, depending on the degree of ownership of a foreign language. Many universities are credited to the first course following the passage of preparatory courses, without exams.

Preparatory programs increase the chance to enroll at the university (including the free department) 5 times. Education in the field of hotel and tourist business
